Subject: Comment regarding agency pricing and lawsuit against publishers

Dear Mr. Read,

I am firmly against the DoJ lawsuit against the five publishers regarding ebook pricing. It will have the effect of silencing thousands of business owners who are adding to the diversity and value of our culture. It is aiding a monopolist. It is short-sighted. It is embarrassing for those of us who support this administration.

The irony of you, with your name, being the chief litigator of this case is delicious.
