Dear Mr. Read,
Please reconsider the DOJ's proposed settlement that would allow Amazon to resume the predatory pricing that allows it to capture 90% of the e-book market while undermining its offline competition. A healthy, competitive book market is vital to our culture. In addition, we should encourage actions that promote the survival of small businesses, so vital to rebuilding our economy. I believe it is not in the public interest for the government to help Amazon use e-books to target traditional bookstores. Thanks you for your consideration of these concerns.
