Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets.

Food is grown and raised in ways that are terrible for the environment, with methods that pollute the water, poison the soil, and threaten our long-term food security.

What's in our food? Why aren't there decent labels telling us where it grew, what chemicals are on it, and if it's genetically modified?

Thank you for giving me the opportunity to comment.

Sincerely,

Joanne Tenney
