Subject: Comments

I am writing because I am concerned that Monsanto is killing our democracy. They own most of the seeds and the right to plant those seeds as they dictate to the farmers. The farmers live in debt, and fear of Monsanto and each year it gets worse with no end in sight for the farmers. They are like indentured slaves.

It is scary when one big bad company owns most of our food. And what they are doing to the seeds is even scarier. GE crops and toxic chemicals are not meant for food for humans or animals. What they are doing to our health, the environment ,air, water, land and animals is criminal. They are killing everything.

Thank you for giving me the opportunity to comment.

Sincerely,

Kathy Kroll
