---

I am writing because I am concerned about the lack of competition in agricultural markets.

I think it is terrible that this big giant, Montesano, is allowed to bully their pesticides and get control of the food industry without transparency to the general public. The damage they have done to our land in the U.S. and other countries will require a lot of measures to bring the agriculture land back to a self-sustainable level to grow our food the way God intended to do no harm and nourish us fully without any side effects to us or the planet. I fully support the organic method of raising our food.

Please, please stop this giant before it is too late.

Thank you for giving me the opportunity to comment.

Sincerely,

Marcia Clarke
