Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets. As a citizen that is concerned about health not just for myself but for the human race, I am outraged, and shocked that a company like Monsanto can rule the food world. Genetically modified food like ROUND UP READY SOYBEANS is nothing short of lacing the foods we eat with DRUGS. Would the FDA let a company genetically put LSD in our food if it would help to keep bugs and weeds away? Please help to stop this madness.

Thank you for giving me the opportunity to comment.

Sincerely, Tom Lonardo
