Subject: Comments

I am writing because I am horrified about the terrible food being produced, processed, and marketed to human beings. A person either has to grow her own garden or risk illnesses and diseases linked to the garbage diet promulgated by Monsanto and other corporate profit-over-health-corporations. It appears that Monsanto,etc is in cahoots with Big Phama to sicken this country and the world. For diabolical control and money.

Thank you, DoJ, for giving me the opportunity to comment.

Sincerely,
Carol Ann Sayle
