US Department of Justice

Dear US Department of Justice:

I do not have enough information to know if Genetically engineered seeds are good or bad. I will not use P or H 'cides in my own gardens. But, as a former economist I know monopolies are bad in the long run. Whether they be Banks, Financial Houses, Energy suppliers or our Food Industry there must be competition. They cannot be "too big to fail" nor can any one of them be so big as to control. We have seen how the Health Care Industry responded to the spectre of competition.

Protect the citizens of our country

Very respectfully,

Jon W Candy MD [Col USAF ret]
