Subject: Comments

I have children with many food allergies, intolerances and sensitivities. They also have reactions to certain pesticides. Two of my children suffer from breathing problems when exposed to pesticides or if they eat them.

I have seen their health improve DRAMATICALLY since removing ALL processed, artificial and genetically modified foods from their diets.

We buy as much organic food as possible. The rest is all natural, without additives or chemicals.

This is and should be MY choice on what goes in MY body, and those of MY children.

It should NOT be dictated by some large company who is only interested in its profit margin and not the health of the consumer.

I am writing because I am concerned about the lack of competition in agricultural markets.

Thank you for giving me the opportunity to comment.

Sincerely,

Lori Culbertson
