Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets. As one of a growing number of people who are chemically sensitive, I am terrified about the hold Monsanto has on food production. It is grown and raised in ways that are terrible for the environment, with methods that pollute the water, poison the soil, and threaten our long-term food security as well as further sickening people who are sensitive..

Thank you for giving me the opportunity to comment.

Sincerely,

Julienne G. Lipson, Novato, CA
