Subject: concern over America's food

Hello:

Please add my voice to the growing list of many other Americans concerned about the quality of our food. I want to feed my family locally raised, grass-fed, humanely raised and slaughtered animal meats, and locally grown produce, and unadulterated dairy products. I want to support local agriculture and reduce consumption of highly transported foods. I am especially concerned about the control over our national food supply by a few mega-corporations who do not care about anything but their own power and money. The way America is currently eating under the control of these corporations is ruining our health and the environment.

I urge you to work to reverse this situation, breaking the stranglehold of American megacorporations like Monsanto and Tyson, and helping citizens by supporting local agriculture.
